

Applications

- Suitable for a wide-range of communication and data transmitting devices where anti-noise and anti-static measurements are essential to implement.
eg. Mobile phone, Radiotelephone, PCMCIA card, etc)

Features

- Compact design allows super-fine pitch mounting
- Equipped with prevention mechanism of spring deformation
- Suitable mechanical design for high speed placement machine contribute to higher productivity.
- Apply an after-plating treatment for the purpose of anti-corrosion of contact area.
