

**NEWS RELEASE****Yokowo Receives the Best Poster Presentation for the First Time at SWTest2025 Held in the US**

Best Poster Presentation trophy

Opto-electronic probe card that was on display

Yokowo Co., Ltd. (Headquarters: Chiyoda-ku, Tokyo; President: Takayuki Tokuma) has announced that it presented a technical poster and was awarded the **Best Poster Presentation award** for the first time at SWTest2025, held in Carlsbad, California, USA.

The SWTest (Semiconductor Wafer Test Conference) is the world's only conference specializing in semiconductor wafers and die-level testing technology. Started in the 1990s, the annual conference was held at the Omni La Costa Resort & Spa in Carlsbad, California, USA, from June 1 to 4, 2025.

Top suppliers of the latest probe cards, probe stations, and related services gather at this international conference, creating a forum for industry leaders to discuss the latest technological developments. It is a great honor for Yokowo to have been awarded the Best Poster Presentation award at such a prestigious conference.

In today's society, the application of AI technologies and the need for large-scale digital data processing have made it necessary to use optical signal processing technologies over conventional technologies to accelerate signal speed and reduce power consumption in semiconductor devices.

In such an environment, Yokowo presented an opto-electronic probe card that incorporates multi-channel optical fiber arrays into conventional product technologies, enabling photonic IC inspection at the wafer level. This was presented along with a technical poster.

Yokowo will continue to leverage its long-standing core technologies to develop technologies that anticipate future social needs, helping to realize a sustainable society.
